## About The Practice

Hoburne Dental Practice has been delivering private dental care for over 25 years at this location and has been established in Christchurch for over 60 years. We pride ourselves in delivering high quality, long - lasting dental care for all the family at affordable prices. As you would expect from a family practice, we offer a full range of dental treatments including dental implants, cosmetic dentistry and invisible orthodontics for adults. We are a close team at Hoburne and we strive to create a caring environment tailored to your needs.

All of our staff pay particular attention to detail from the moment you contact us. We have a warm and friendly atmosphere which we believe will help to make your visit to Hoburne Dental Practice a pleasant and stress free experience.

## The Surgeries

We continually invest in our equipment and materials to ensure that the patient experience is as good as it can be. The surgeries are modern, clean and well equipped to produce the highest levels of dentistry and we are constantly striving to improve our standards by continual professional training.

## Disabled Access

Our practice is completely based on the ground floor and has good disabled access. There are ramps into the practice, widened corridors and a disabled toilet. We have good access for disabled patients and visitors. There is a specific car parking space available for our disabled patients.

We endeavour to see all patients and our practice has been designed so patients with disabilities can access care.

If you do have any disability that you think we need to know about please give us a call before your appointment and we will do our best to put suitable arrangements in place to accommodate your needs.

## Patient confidentiality

We take patient confidentiality extremely seriously at Hoburne Dental Practice and all personal information is treated in the strictest confidence. Only members of staff have access to patient information. All our patient records are securely stored at our practice to ensure that any patient information is only accessed as part of your treatment. No information will ever be released to a third party without your express permission or where required by law. We have a strict confidentiality policy. To see a copy of

this policy or if you would like further information regarding your rights to view your patient records please contact please ask at reception.

## Methods of payment

We accept the following methods of payment at the practice: cash, cheque and all major credit and debit cards (Except Amex).

## Other information

You can express a preference about which dentist you will see. We will make all reasonable efforts to ensure that the request is met, but this may not always be possible. Should you wish to express a preference of practitioner, please state who you would like to be seen by when booking your appointment.

## Complaints procedure

We aim to make your experience at the practice as pleasurable as possible. However, should you have any complaints or comments, please contact the Practice Manager, Mr Michael Pilling in writing or by telephone number 01425 277245 *option 3* or via email; [practicemanager@hoburne-dental.co.uk](mailto:practicemanager@hoburne-dental.co.uk) who will be able to deal with your complaint and talk you through our procedure. Alternatively, you can pick up a copy of the procedure from reception.

We are **Care Quality Commission (CQC) Registered** and have recently been inspected and are compliant to the highest standards. We are also a **British Dental Association Good Practice member for the past 19 years**.

## Opening Hours

Monday	08.30 – 16.30
Tuesday	08.30 – 16.30
Wednesday	08.30 – 16.30
Thursday	08.30 – 16.30
Friday	08.00 – 16.00

## Dentists

### **Peter Willy BDS, MFDS RCPS, Dip Imp Dent, Dip FFGDP, FDS RCS, FCGDent**

Peter delivers high quality long lasting dental treatment and has a friendly manner which helps put nervous patients at ease. He discusses all treatment options to help his patients make the right decision on the best route forwards.

He is able to provide reconstruction of heavily worn and damaged teeth with a combination of cosmetic, restorative, orthodontic and implant options. He is a certified Invisalign provider for clear aligner orthodontic treatment.

When required he is able to combine a blend of orthodontic tooth movement with cosmetic dentistry to deliver beautiful smiles for his patients. These techniques are now widely recognised as the most up-to-date way to enhance a smile with minimal impact on the lifespan of the dentition.

Peter is highly trained in the surgical placement of single or multiple implants to replace one or more missing teeth. He is also able to stabilise poor functioning loose dentures with dental implants.

After graduating from Bristol University in 1998, Peter spent five years working as a trainee Oral Surgeon in various hospitals in the South West of England including local specialist teams based at Poole General, Royal Bournemouth and Dorchester Hospitals. He spent two years studying for his postgraduate dental surgical examinations (MFDS) and published four scientific papers in peer-reviewed international dental journals. During this time, he also gained considerable experience working alongside specialists at Bristol Dental Hospital. In 2003 he moved to general dental practice, he joined Hoburne Dental Practice in 2005 and became a partner at the practice a year later.

Following his hospital training Peter went on to advance his cosmetic, restorative and implant skills with seven years of part time study at the UCL Eastman Dental Institute. During this period, he was taught directly by some of London's leading dental specialists, completing the Certificate Course in Restorative Dental Practice along with further studies in the fields of Applied Clinical Dental Materials and Partial Denture Prosthetics. The study period culminated in 2011 with a distinction grade on the four-year Diploma in Implant Dentistry and winning the overall prize for Outstanding Achievement in his year group. In 2014 Peter passed the Fellowship Diploma examination of the Faculty of General Dental Practitioners.

Peter is married to Susan, who teaches locally, and they are both kept busy with three children. He enjoys keeping fit and exploring the local countryside.

Peter is a member of the following professional organisations:

- Association of Dental Implantology UK
- Certified Invisalign Provider
- British Society of Prosthodontics
- British Dental Association
- General Dental Council

**GDC Number: 74324**

**Bachelor of Dental Surgery (Bristol University)**

**Diploma of Membership of the Faculty of Dental Surgery (Royal College of Physicians & Surgeons (Glasgow))**

**Diploma in Implant Dentistry (University College London)**

**Diploma of Fellowship of Faculty of General Dental Practitioners (UK)**

**Fellow of Faculty of Dental Surgery (Royal College of Surgeons of England)**

**Fellow of the College of General Dentistry**

### **Mrs Joanna Dorsett BDS, PG Cert**

Graduating with a Bachelor of Dental Surgery degree and a Distinction in Restorative Dentistry in 2003, Joanna comes from a family of dentists, following in the footsteps of her parents before her. She initially worked in her parents' private practice in Portsmouth before moving to Bournemouth and working as an Associate Dentist. In 2018 She was awarded a postgraduate certificate in Restorative Dental Practice with distinction from the UCL Eastman Dental Hospital.

Joey lives in Poole and is married to Richard. They have two children, Eddie and Zara, plus dogs Ben and Harry to keep them busy. When she's not carrying out dentistry, she enjoys sailing, skiing and socialising with friends.

**GDC: 82474**

**Bachelor of Dental Surgery (London)**

**Post Graduate Certificate (UCL)**

### **Mr Matthew Leadbitter BSc (Hons), PhD, BDS, Dip Restorative Dental Practice**

Matthew's career originally started as a biomedical research scientist; he achieved a first class degree in Cell Biology at Durham University and went on to gain a PhD in Cancer genetics at Cardiff University's School of Medicine. Matthew retrained as a postgraduate dentist at the Peninsula Dental School in Plymouth, where he was one of the few students in his year to be awarded his degree with distinction (honours). Following this, Matthew relocated to Bournemouth where he has since practiced.

Matthew is truly passionate about dentistry and takes pride in achieving the best for his patients. He strives to deliver high quality dentistry and continues to educate himself in contemporary materials, techniques and doctrines. Amongst a myriad of courses and further education notable qualifications include a 3-year part-time Diploma in Restorative Dentistry at the Eastman Dental Hospital, where he was again awarded the highest possible merit (Distinction). He also has certified training in the delivery of BioClear restorations levels 1-4.

Matthew is very personable, has a relaxed and friendly approach and welcomes the opportunity to help those patients who usually find the dentist an anxious experience. Outside of work Matthew enjoys swimming to keep fit, skiing (when the opportunity arises!), cooking and looking after his family. He also enjoys playing guitar and has been known to play in bands when time allows. He is married to Suzie, also a dentist in Bournemouth, and has a son, Edward, and daughter, Imogen.

**GDC registration - 258285**

**Bachelor of Science (Hons) (Durham University)**

**Doctor of Philosophy (Cardiff University)**

**Bachelor of Dental Surgery (Plymouth)**

**Diploma in Restorative Dental Practice (University College London)**

### **Mrs Amy Bray MA (Cantab), BDS, PGCert**

After studying Natural Sciences at the University of Cambridge, Amy went on to study Dentistry at The University of Bristol. Amy graduated top of her class and was awarded the Dental Gold Medal. Since qualifying in 2016, Amy has gone on to develop her restorative skills through various courses and has recently studied Fixed and Removable Prosthodontics at Kings College London where she was awarded a postgraduate certificate with distinction.

Amy is passionate about dentistry and delivering excellent quality care with attention to detail. She has extensive experience working with anxious patients and enjoys creating an environment where patients can feel at ease and comfortable in the dental chair. Amy's academic background and achievements to date reflect her drive for ongoing development and continued learning, and she enjoys to keep up to speed with advancing materials and techniques.

Amy lives in Poole with her husband Alex who is a local GP, and their daughter Connie. Amy enjoys an active lifestyle and loves an invigorating sea dip all year round. Amy also has a passion for crafts and is a keen silversmith and knitter.

**GDC Number: 264908**

**Master of Arts (Cambridge University)**

**Bachelor of Dental Surgery (Bristol University)**

**Post Graduate Certificate (Kings College London)**

### **Miss Sophie Reynolds BSc, BDS**

Sophie is a compassionate dentist dedicated to delivering high-quality care to her patients. She began her academic journey with an undergraduate degree in Biochemistry from the University of Birmingham, before going on to study Dentistry as a postgraduate at the University of Central Lancashire.

After gaining valuable experience working in Sheffield, Sophie returned to her hometown of Bournemouth to continue her career closer to family and friends. She has completed a year-long course in restorative dentistry and remains committed to ongoing professional development, continually updating her skills to provide the best possible care.

Sophie offers a wide range of treatments, including general dentistry, Invisalign, and cosmetic procedures such as composite bonding. Her calm, friendly approach helps put patients at ease, whether they're visiting for a routine check-up or a smile transformation.

Outside the clinic, Sophie is an outdoor enthusiast who enjoys playing sports, cycling, hiking, and exploring the Dorset coastline with her dog.

**GDC: 290965**

**Bachelor of Science (Hons) (Birmingham University)**

**Bachelor of Dental Surgery (University of Central Lancashire)**

## Meet the team

### Clinical Team

All our dental nurses are GDC Registered and appropriately trained to help put patients at ease and to create a pleasant and comfortable experience.

They are responsible for maintaining strict cross-infection controls to ensure patients and the knowledgeable about all aspects of dentistry. All Dental Nurses have to have Professional Indemnity, are DBS (CRB) checked and have to complete verifiable Continual Professional Development on an annual basis.

**Andrea Smith**  
Lead Dental Nurse / Reception

**Gemma Hamilton-Brown**  
Dental Nurse / Reception

**Jill James**  
Dental Nurse

**Martyna Poranek**  
Dental Nurse

**Caitlin Hartigan**  
Dental Nurse /  
Reception

**Claudia Stimpson**  
Dental Nurse /  
Reception

**Grace Davies**  
Dental Nurse /  
Reception

### Administration Team

Our receptionist team consists of Lian and Carly who have a wealth of experience and qualifications to keep the practice running smoothly, helping our patients to feel welcome and relaxed. They are often assisted by other members of the team.

**Lian Scott-Douglas**  
Reception and Admin Manager

**Carly Lynch**  
Dental Nurse / Reception

## **Practice Manager**

**Mr Michael Pilling**

**General Dental Council (Registration No.105853)**

Michael joined us in June 2012 as the Practice Manager. He initially qualified as a Dental Nurse in 1986 at the Royal Air Force Institute of Dental Health and Training. He spent 23 years in the RAF in a variety of dental environments.

Since leaving the Royal Air Force in December 2008 he worked as a Manager of a Dental Practice in Poole. He now spends the majority of his time dealing with the day to day running of the practice and ensuring compliance with current legislation.

Outside of work he lives with his fiancé, Rachel in Upton and enjoys running and travelling.

## Nervous & Anxious Patients

Being nervous or anxious about visiting the dentist is a common condition that affects a large proportion of people. Some patients are so fearful or anxious about visiting the dentist that their oral health suffers as a result.

### We can help!

At Hoburne Dental Practice we have years of experience dealing with fearful and nervous patients and we will try to make your dental visit as comfortable as possible.

*"I didn't think I would ever be able to tolerate going to the dentist again, having had some bad experiences I was so scared. I have surprised myself by just having a course of treatment at Hoburne Dental Practice. **I can't thank them enough**, from the first phone call and visit, to my treatment starting they have been **brilliant**. Listening to all my fears and putting me at ease, taking time to explain what they were doing at each stage. I really can't recommend them enough, if you are a petrified dental patient but need your teeth repaired then this is the place to go."* **Mrs BH**

### How we help you?

On your first visit to the practice we take a full record of your dental history, which will give us much information regarding your dental concerns. If you are very nervous and want to take things more slowly, we have found that for some people it has been helpful just to sit in the waiting room to get a feel for the practice before taking things any further, please ask us if you would like to do this. On your first visit we will discuss with you why you feel so anxious about visiting the dentist. We have a huge amount of experience in helping phobic patients overcome their dental fears.

*"I was a **nervous patient** and after a bad experience at my previous dentist I needed some emergency treatment. The dentist and Carly have been **so supportive and caring**. Truly **professional in everyway!**"* **Mrs HS**

By talking about your concerns and worries it is possible to make your future visits more pleasant. **Your well-being is important to us** and we will be able to work alongside you to overcome your fears.

*"I have recently been in to see Matt Leadbitter. This is my first dental appointment in over ten years due to me being scared witless of dentists. Matt was **kind, patient and most of all understanding** throughout it all. Explained exactly what was going to happen and how I could try to make the experience as least stressful as possible. After a replaced filling which was completely **pain free** I am now happy to return whenever necessary. All staff have been **very nice** to me. Many thanks for restoring my faith in dentists."* **Mrs SH**

We have transformed the oral health of dozens of patients who have been unable to see a dentist, all of them will admit that they are now much more comfortable coming to the dentist than they were prior to their first visit to see us. Some have even said that coming to the dentist no longer bothers them now that they have trust in the service we provide.

*"I made an appointment as I discovered that you dealt with **nervous patients**. I had lost my confidence following a stroke over three years ago and was reluctant to go to a dentist. The reception staff were **very kind** and I was helped into the surgery by the dental assistant. I was still feeling anxious, but as the door opened the dentist, namely Matthew Leadbitter, gave me such a beaming smile and asked me what I would like to be called. This **put me at ease**, as did his reassuring enquiries. He was **so kind and gentle** that I felt I had known him for a very long time. After the check up he told me very clearly what treatment I needed. I have since been back four times and Matthew made me feel **at ease** on each occasion before starting the treatment. I can thoroughly recommend the Hoburne Dental Practice and would not go elsewhere. I would like to thank Matthew and his assistant Carly **for helping me over my anxiety**. Mrs MB*

*"I am first time patient of Hoburne Dental Practice. I have always suffered with a **very severe dental anxiety**, and I have long been looking for a place to have my teeth fixed. I knew I required extensive work including 2 extractions and several fillings.*

*I plucked up the courage to visit my local dentist, and found them to be very cold, uncaring and rushed for time. They were very keen to have me in and out, and they provided me with no reassurance.*

*I heard of Matthew Leadbitter through a **Dental Anxiety website**, and thought I would visit him. The experience with Matthew at Hoburne was night and day from anything else I'd experienced. He had all the time in the world from me, he was **very polite, friendly and incredibly sensitive to my fears**. I booked an appointment for my extraction and I was very scared to say the least. I was given **plenty of reassurance**, he gave me **all the time in the world** to be a big baby, and he worked at a pace I was comfortable with.*

*But it wasn't just Matthew that made the experience much nicer. The receptionists were **all smiley and very friendly**. Even if your appointment is just a few minutes later than expected, they are there apologising and offering you a drink or having a chat with you. I really can't speak highly enough of my experience. I will always visit Hoburne for any future work." Mr TT*

For patients who are **very anxious** we are able to offer sedation. Sedation can be used to put you in a relaxed, dream-like state of mind and is only carried out by a fully qualified, General Medical Council registered Anaesthetist. See overleaf for more information on sedation.

## Dental Sedation

*"I have always been a nervous patient since childhood and let my dental treatment lapse and felt very uneasy about going to the dentist even for a check up. It was obvious I needed a lot of work done. The thought was awful but I discussed sedation with my dentist and he reassured me, giving me confidence to come along. On the day of my treatment I was still nervous but you and the doctor that had come to carry out the sedation, really put me at ease. I can't thank you enough for that, and although I must return to complete the treatment, I am no longer dreading it."*

Mrs FC, Boscombe

For very anxious patients we offer the additional service of **Dental Sedation**. Sedation is a technique used to reduce your anxiety and minimise any discomfort during your dental treatment, whilst remaining conscious at all times.

We work with a group of Consultant Anaesthetists called 3H Sedation, these work with some of the best practices in the UK, including specialist Harley Street practices. The sedation will be provided by an Anaesthetist who will have had a least 10 years specialist training in all forms of sedation and anaesthetic techniques. The Anaesthetist remains in the surgery whilst you have your dental treatment to ensure that you are being carefully monitored.

A small cannula is placed in the back of your hand and medicines are administered to control the amount of sedation. It may be necessary to administer a mild sedative tablet or to apply topical anaesthetic gel prior to this procedure.

Because this is not General Anaesthetic it is important that you have a small amount to eat and drink prior to your dental treatment. Once you are adequately sedated, the dental procedure will begin. Your anaesthetist will maintain an **adequate level** of sedation throughout your treatment. You may feel sleepy after your treatment and it is important that you have somebody with you to take you home afterwards.

This sedation treatment is for patients who have **moderate to severe** dental anxiety and need the highest level of sedation which cannot be met by a mild sedative tablet. There is a hourly charge for this service which will be added to your dental estimate.

Using sedation techniques it is possible to complete a large amount of treatment in one visit and this be more cost effective than lots of shorter appointments. Sedation is only available to adults above 18 years of age and on young adults between 16 - 18 after consultation.

If you wish to enquire about this service please ask at reception or speak to your dentist.

# New Patient Dental Examination

We believe that our New Patient Dental Examination is what sets us apart from other dental practices. Our new patient examinations are methodical, thorough and carried out to the highest standards. All new patient clinical examinations include the following:

## In Reception

We carry out a check of personal details and relevant medical and dental information and a **smile questionnaire** to find out if there are any specific issues **you** would like to be addressed. We also take a complete check of medical issues, medication and lifestyle factors which can affect dental health problems. If requested we can also complete **Dental Anxiety questionnaire** and consultation.

## In the Surgery

### Check on any dental problems

We carry out a comprehensive oral examination detailing **the current standard of all teeth**, restorations and any missing spaces and gaps. We also look at existing restorations, **checking their durability**; fillings, crowns, bridges and dentures.

We also check of any **erosion, abrasion & sensitivity** of your teeth and finally we check the Occlusion – check **how the teeth fit together**.

### Hard & Soft Tissues

We also check the Soft Tissues – check of lips, cheeks and tongue and **oral cancer screening**. We also check both the Upper and Lower jaws, looking at the main socket joint (TMJ) and the main facial muscles. Problems with the jaws can cause other problems including migraines and difficulties eating.

### Gum Health

We complete a **Basic Periodontal Examination** and **Oral health check**, looking at specific gum health, mobility and bleeding and we look at the amount of plaque and tartar deposits and the general cleanliness of the mouth.

### Bone level analysis

We look at the long term prognosis of the teeth and analyse the mobility of any teeth (whether the teeth are loose).

### Other

As part of a full examination will we take necessary cavity detection x-rays; all x-rays are viewed on a monitor together, so we can demonstrate why treatment is required.

Use any other diagnostic aids necessary to render a thorough examination, including photographs. Finally we will provide a full written estimate, with explanation of finance options.

# Gum Health and Dental Hygiene

Most patients will be referred to the dental Hygienist as part of their examination appointment.

Dental hygienists are specially trained to work with the dentist in giving care to patients. They play an important role in dental health care and are mainly concerned with gum health, showing people correct home care and applying preventive materials to the teeth and gums.

## What is the hygienist's role in the practice?

The hygienist's main role is to professionally clean the teeth for the patient. This is usually called scaling and polishing. However, perhaps their most important role is showing the patient the best way to keep the teeth free of plaque. They also give advice on diet and preventing dental decay. The hygienist will work with your dentist to provide care tailored to your needs.

Scaling and polishing is usually pain-free. However, if you do have any discomfort the hygienist can use anaesthetic creams, or give you some local anaesthetic. It is important that you let the hygienist know at the time so they can help with your pain.

## Gum disease (Gingivitis)

A healthy set of gums should be pink and firm, and will keep your teeth securely anchored into place. Your gums should not bleed when you touch or brush them. If you develop gingivitis, it is your gums that will be affected. The main symptoms of gingivitis include:

- tender, painful gums,
- swelling and redness in the gums, and
- bleeding gums, after you brush your teeth.

For most patients routine hygienist appointments are sufficient at treating any gum problems and will require one appointment around the same time as their examination appointment. For patients that haven't been to the hygienist in a while it may be necessary to have a slightly longer appointment or even two or more appointments.

Long-standing gingivitis can turn into **periodontal disease**. There are a number of types of disease and they all affect the tissues supporting the teeth. As the disease gets worse the bone anchoring the teeth in the jaw is lost, making the teeth loose. If this is not treated, the teeth may eventually fall out.

### What treatments are needed?

Our Dental Hygienist will clean your teeth thoroughly to remove the scale. They may also use a periodontal probe to take depth measurements of the pockets between the teeth and the gum. You may also have x-rays taken to show the pocket depths or bone loss.

Patients with periodontal disease may require frequent appointments to limit the damage of the disease. In severe cases, patients can be referred to specialist Periodontal clinics where they may need long term ongoing care.

### Preventative Team

The primary roles of our Therapists and Hygienists are to ensure your mouth remains healthy and free from tooth decay and gum disease. This is achieved by professionally deep cleaning your teeth and gums and teaching you the best brushing and flossing techniques for improving your dental routine at home.

We also have an Air Flow polisher which can be used by all Therapists and Hygienists for stain removal as an additional visit.

We have at least one Hygienist or Therapist working every day in the practice.

**Leianne Spaulding**  
Therapist  
Monday

**Owen Way**  
Hygienist  
Monday  
Tuesday

**Wendy Rowley**  
Hygienist  
Tuesday

**Georgia Warne**  
Hygienist  
Wednesday  
Thursday

**Kayley Wells**  
Therapist  
Thursday  
Friday

# Dental Implants

## What are Dental Implants?

A Dental Implant is an artificial replacement for a tooth root, typically made from titanium. Once implants are placed they are then used to support a single tooth, multiple teeth or even **dentures**.

"I have just completed treatment for a **front tooth implant and crown** from Peter Willy. The procedure was **explained** to me **in great detail**. I am very impressed and happy with the results, in particular with the toning and matching to my other teeth. Thank you to Peter, and the rest of the team for their professionalism and friendliness". **Mrs AN (Barton on Sea)**

## What does the Treatment Involve?

The **first stage** is to attend the practice for a consultation to see if you are suitable for implant treatment. It may be necessary to have x-rays taken and plaster models of your teeth made to check whether an implant would be the right treatment for you. It may also be necessary with more complex cases to arrange for a **Cone Beam CT (CBCT) Scan** to be taken. The **second stage** of treatment involves the surgical placement of implant(s) which is then left for three months to integrate fully with the jaw bone. Subsequent appointments involve placing locators onto the implants and attaching the crown, bridge or denture onto the implant.

## Who can have implants?

Most people can have implant treatment. As the placement is a small surgical procedure, your medical details are important. Also the health and availability of the bone will need to be assessed.

### One missing tooth

A titanium implant effectively replaces the missing root. Once integrated with the jawbone a porcelain crown can be securely and permanently fixed onto the implant. This reduces the need for a denture or permanently cemented bridge.

### Multiple missing teeth

Where you are missing more than one tooth it is possible to provide an implant-based solution. In this example two implants are placed to replace three missing teeth. By placing 2 implants a bridge can be retained to stop it moving.

## **No lower or upper teeth**

Implants can provide a stable solution to an otherwise unacceptable situation for patients. Loose lower dentures are common, and patients suffer emotional and physical side-effects. By placing 2 implants it is possible to give these patients a set of teeth that are fixed, but can be removed for cleaning. It is by far one of the most beneficial advances in dentistry in the last 20 years.

## **Why choose Hoburne?**

Hoburne Dental Practice has three experienced and qualified implant dentists (each with an appropriate qualification to place implants) who will look after you from the initial consultation through the surgery and on to the after-care that is so important. We only use the prestigious Nobel Biocare® and Straumann® Implant systems. Our dental technicians are specially selected to assist us to create the most aesthetically pleasing results.

## **What is the price?**

We offer an inclusive price for these surgical procedures which covers the treatment planning, any x-rays that are required (apart from CBCT scans), the surgery, titanium implants and healing caps, and finally the gold locator attachments that clip onto the implants. You will be given a detailed estimate, information pack and relevant consent forms prior to any treatment being carried out.

## **Implant Consultation**

If you are interested in finding out whether Dental Implants are the right choice for you, please ask the reception team about our Implant Consultation with a dentist. This is a 30 minute, no obligation appointment with a qualified dentist who will be able to answer any questions you may have. If implants are a possibility and you would like an estimate regarding treatment costs then it will be necessary to have suitable x-rays, scans or impressions taken. These will be chargeable items which may need an additional appointment to complete.

## **Aftercare**

Implants can last a lifetime if they are maintained regularly. Patients will need a minimum of an annual review appointment to ensure that they are being maintained appropriately.

# Invisalign®

Hoburne Dental Practice are able to provide near-invisible braces for cases of crooked, twisted or mis-aligned teeth. All treatment is assessed on a case-by-case basis.

## Invisalign®

World leading Invisible brace system has come to Hoburne. Join one of the 4.5 million that have gained the confidence to smile again.

### What is Invisalign®?

Invisalign is the virtually invisible way to straighten your teeth and achieve the smile you've always dreamed of.

A treatment plan is devised using 3D computer-imaging technology. You will be shown a simulation depicting the planned tooth movements from the starting position through to the desired result.

A series of clear aligners are custom-made for your teeth to move them little by little. Each aligner is worn for about two weeks before being replaced by the next in the series, gradually moving towards the projected final position.

ClinCheck® Software  
This video is a simulation and treatment results may vary.  
The actual treatment plan is determined by your doctor.

Stage 0 of 23

**Starting position**

ClinCheck® Software  
This video is a simulation and treatment results may vary.  
The actual treatment plan is determined by your doctor.

Stage 23 of 23

**Projected final position**

Your Invisalign treatment time will be determined based on your specific needs.

### What are the benefits of Invisalign?

Invisalign aligners are nearly invisible. No one may notice that you're wearing these virtually invisible aligners, making Invisalign a seamless fit with your lifestyle and day-to-day interactions with others.

Invisalign aligners are removable giving you the flexibility to eat and drink what you want during treatment. This also allows you to brush and floss as you normally would for fresh breath and to maintain good oral hygiene.

Unlike traditional fixed braces, there are no metal brackets or wires. This means that in most cases less time is spent in your practice for adjustments. Previous patients have highlighted

the benefit of being able to view the final result and treatment plan before you begin treatment so you can see how your teeth are expected to look when your treatment is complete.

### **Is this a new way to straighten teeth?**

Dentists and Orthodontists have successfully used removable appliances for years. But with the application of 3D computer technology the Invisalign System can be used to treat a wide range of patients who want straighter teeth. The unique ClinCheck® software allows patients to see their treatment plan from beginning to end even before the start of treatment. The use of the advanced 3D computer-imaging technology allows the Invisalign system to be used on a wider range of patients who want straighter teeth.

### **What types of cases can Invisalign® help with?**

Invisalign can be used for many types of orthodontic problems and is an alternative for fixed braces. Invisalign moves not only the teeth, but the roots as well.

### **How long will the treatment take?**

Treatment can be relatively short for cases where there is a relapse following conventional orthodontic treatment for example 3-6 months. Most treatment will take 6-18 months, which is slightly less than normal fixed braces.

### **How many appointments will I need?**

This depends on the complexity of the treatment required. The beauty of Invisalign® is that once treatment commences you will receive a series of slightly different aligners, reducing the number of appointments needed.

### **What happens next if I want to know more?**

Please make an appointment with Peter for a no-obligation consultation. He will be able to assess your requirements and provide you with more information.

### **Payment Options**

A full estimate of treatment costs will be provided following analysis by the laboratory. Treatment costs can be spread using third-party finance (subject to T & Cs), if you would like further information about treatment or finance please speak to the practice.

Peter Willy is the **Certified Invisalign Provider** at Hoburne Dental Practice. Book a consultation at Hoburne Dental Practice today and start your new smile journey.

# Hoburne Dental Plan

Welcome to our dental plan. Being on a dental plan allows you to pay for all of your essential care by monthly direct debit. These essentials include examinations, hygiene appointments and all small x-rays. At your initial consultation your dentist will advise you of the most appropriate plan for your needs. There is **no joining fee**, and all our plans provide the following benefits:

## Summary of benefits

- **10% discount on routine dentistry.**
- **5% discount on all dental implant and orthodontic treatments.**
- **Free emergency consultations at Hoburne Dental Practice** (a fee will be charged for any treatment that is subsequently needed)
- **Free dental prescriptions \*\*Except antibiotic cover**
- **Free small in mouth X-rays**
- **Spread the cost of all essential maintenance** (examinations, hygienist and routine x-rays of back teeth).
- **UK 'out of hours' dental emergency call out cover.** (Any emergency call outs can be reimbursed subject to T&Cs)
- **Worldwide dental emergency cover** in case of a problem whilst away from home.
- **Trauma / accidental damage to teeth covered.** (The Practice pays for an insurance policy that covers you for dental trauma).
- **Plans are available for everyone.**
- **Further 10% discount on the monthly costs for a parent when a child under 18 joins (family plan).**

### **Please note the following:**

*You will be eligible to join one of the Hoburne Dental Plans once you are made dentally fit after the completion of your first treatment plan.*

*Our plans are an 'essentials' scheme where patients will, in the long run, pay less for their dentistry by way of discounted fees. Patients are advised that our plans do not cover the cost of all necessary dental treatment (such as fillings, crowns etc).*

*Please ask a member of staff or see our website for further information.*

## Testimonials – What our patients say about us

**Hilary L - Dec 2023**

Over the years I have been to several dentists and have always been terrified however since finding Matthew Leadbitter recommended for nervous patients I can now enter the surgery with a smile on my face. I have needed a lot of treatment but every procedure has been thoroughly explained, taken at a relaxed pace and conducted with gentle kindness, humour and never, ever hurried. Kayleigh, my hygienist, is both friendly and professional. She is so encouraging whilst explaining how I can keep my standards of care top notch. The receptionists are welcoming, friendly and thoroughly efficient making appointments to fit you rather than making you fit the system & Michael, the Practice Manager is a friendly cheerful presence. I cannot recommend, praise and thank them all enough.

**Lisa G- March 2024**

I have been going to this practice for 2 years and have always seen Jo. I can honestly say she is the loveliest dentist I have ever had. She is so knowledgeable and explains everything to you so you understand exactly what your treatment consists of. She is patient and kind and I feel very safe in her hands. Her dental assistants have all been so nice too. I won't see any other dentist than Jo now as I trust her completely. She always makes me feel relaxed. Thank you Jo. The practice is spotlessly clean and the receptionists are also very competent and polite. Great practice.

**S Quinn- April 2024**

Just had to leave a review for this practice as so far it's been brilliant. Saw Matthew yesterday and ,well this guy is something else! He is just brilliant, and I'm a very nervous patient but had to find a new dentist as mine had moved on ,so came here, he and his nurse even had me tapping my hand to the music they put on for me. This is very unusual for me whilst having treatment. To be honest I liked my old dentist but to be honest this guy truly is brilliant. I have found them all to be helpful also the hygienist is very good. Just had to write about my experience yesterday as unbelievable how I felt, he is just brilliant! Thank you so much.

**Linda S- April 2024**

I have recently finished extensive implant surgery with Peter Willy. I found Peter to be extremely knowledgeable and professional together with his assistants Gemma and Andrea they always made me feel at ease explaining all my treatments. I absolutely love my new teeth and would 100% recommend Peter together with his excellent team at Hoburne Dental Practice.

**Tom- May 2023**

I recently joined the surgery after needing some dental work, they have all been so good and helpful! Reception staff very helpful and polite, hygienist done a fantastic job and the dentist and assistant who worked on my teeth have done a great job!  
Very highly recommend this practice to anyone local wanting a good honest dentist!!

#### **Carol C- Nov 2023**

I had two teeth removed and opted for implants instead of a denture. I had a CT scan, was assessed for suitability and the procedure was fully explained to me. I had titanium implants and a bone graft which was also straightforward. Interim appointments were made to check the implants and take impressions in readiness for the porcelain teeth to be fitted. The whole procedure took about five months to allow healing in between treatments. There was some swelling of my jaw which went down within about three weeks. When the teeth were fitted they were perfect. I was kept informed about every aspect of the treatment and Peter Willy was happy to answer any questions that I had. I am extremely pleased with all aspects of this procedure and wouldn't hesitate to go down this road again if ever the need arose. I am very grateful to Peter, his dental nurse and Hoburne Dental Practice for the excellent treatment that I received.

#### **Sarah H – Feb 2024**

I was really fearful of the Dentist couldn't even have a simple Xray taken but wonderful Matthew guided me through. Had to have a fair bit of treatment and every time compassion was given at every stage. Best dental practice I've ever been to. All staff are wonderful from receptionists to dental nurses to Dentists. Thanks to Hoburne I'm now less fearful. ❤️

#### **Anon – May 2024**

I just wanted to drop a line of thanks to the whole team, in particular Joey, Owen and co - in looking after my step daughter so wonderfully. She has an ASD diagnosis and can find situations quite over whelming so I was a little nervous for her as she has had negative dental experiences in the past. BUT both her check-up with Joey, subsequent treatment and hygienist with Owen was a total success. She was treated with compassion and understanding and as a result had a really positive experience. So often she is left with feelings of shame and embarrassment and that she is under performing in some way - even teeth cleaning. But not this time and for that I am so grateful. Please pass on my thanks to everyone.

#### **John P- Jan 2024**

The knowledge, skills and professionalism of the whole team at Hoburne continue to be exceptional and evolve and develop over time. This morning, the hygienist appointment stood out in particular. The dedication to providing a caring and empathetic experience for the client by the two clinicians concerned could not have been bettered. Thank you to everyone involved at the practice for what you provide for our local community, and best wishes for a successful completion of your current development.

#### **Roger W – Oct 2023**

Excellent emergency service. Seen within 3 hours of an accident. Hoburne reset my broken upper jaw, stitched up my lip and saved the four teeth that came away on the broken part of the jaw. I was amazed and grateful for the skill and professional treatment I received.
